

TIR seminar on the construction of customs secure vehicles

Seminar requested bring to the attention of AC 2 the following :

- **Need for more details (sketches, EN, comments , best practices, ...) and updates.**
- **Security vary for different types of vehicles.**
- **Model approval report is useful, but there is a need for an editable format.**
- **National Certification becomes computerized. International database should be pursued. Data protection can be problematic. → TIRExB**
- **Certificates on multiple pages should be secured by means of stamps or secure binding → TIRExB**

TIR seminar on the construction of customs secure vehicles

- **Need : keeping inspectors up to date + International exchange of information and good practices.**
- **The cost of issuance of certificates ?**
- **Need for a clarification on how to deal with foreign vehicles which should not have been approved.**
- **Provisions related to the fastening of the thongs seem unclear.**
