

**I. Proposal to correct document ECE/TRANS/WP.29/2013/55
(Supplement 4 to the 02 series of amendments to Regulation
No. 117 (Tyres, rolling resistance, rolling noise and wet grip))**

Page 1, insert at the end of the page:

Annex 4, the title, insert the reference to footnote ¹ and footnote ¹, to read:

"¹ The specifications for the test site reproduced in this annex are valid until the end of the period indicated in para. 12.9."

II. Justification

ECE/TRANS/WP.29/2013/55 adopted by the Working Party on Noise (GRB) at its fifty-seventh session, aims at updating the test track requirements to ISO 10844:2011. As a result of this update, the transitional period indicated in para. 12.9 to allow time for the repaving of the test track according to the new ISO standard, implies that the test track specifications reproduced in Annex IV are still valid until the end of the above mentioned transitional period. This corrigendum aims at clarifying better this agreement of GRB.
