

European Agreement on Main International Railway Lines (AGC)

**Session II: Infrastructure connectivity for
integrated intermodal transport and logistics**

Forum on Sustainable Transport
Connectivity between Europe and Asia

UNECE

- Establishment of the international legal and technical framework for coherent international network of railway infrastructure and a coordinated plan for its development. The **E-Rail** network. To facilitate east-west connectivity through the railways
- Identification of the railway lines of major international importance (*annex I*)
- Definition of technical characteristics of the railway lines of major international importance (*annex II*)

AGC

Contracting Parties

27 Contracting Parties

AGC Network

*Shows also AGTC lines

The focus remains on ensuring the coordinated development of a harmonized railway network.

Contracting Parties are responsible for its implementation (including introducing necessary amendments to Annexes I and II)

Member States not yet Contracting Parties shall accede to the AGC and take steps to ensure its implementation

Thank you

Francesco Dionori
Secretary, SC.2
