Multi-User Scenario Catalogue for CAVs (MUSICC)

Ian Yarnold and Richard Holland

The Challenge – Assuring the Safety of Connected & Autonomous Vehicles

- The driving task requires: Perception > Decision Making > Control in an extensive range of complicated scenarios

- The human driver is very good at this, the vast majority of the time.

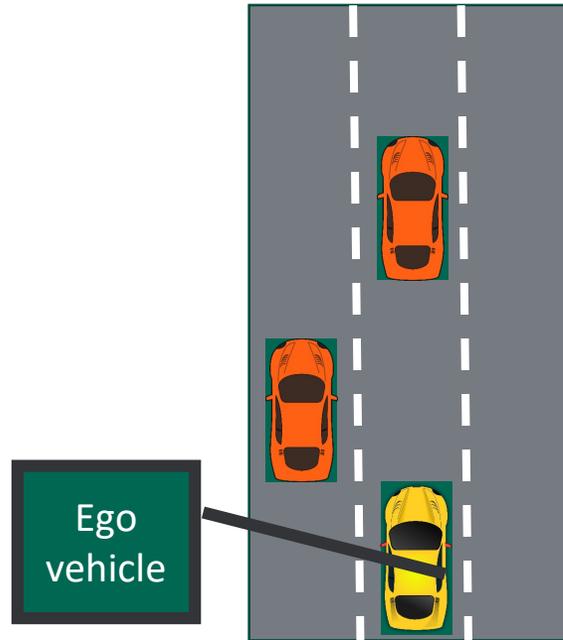

- Automation of the driving task brings a step change in the complexity of software deployed on road vehicles.

- Traditional methods are insufficient to test so many possible scenarios

What is a Scenario?

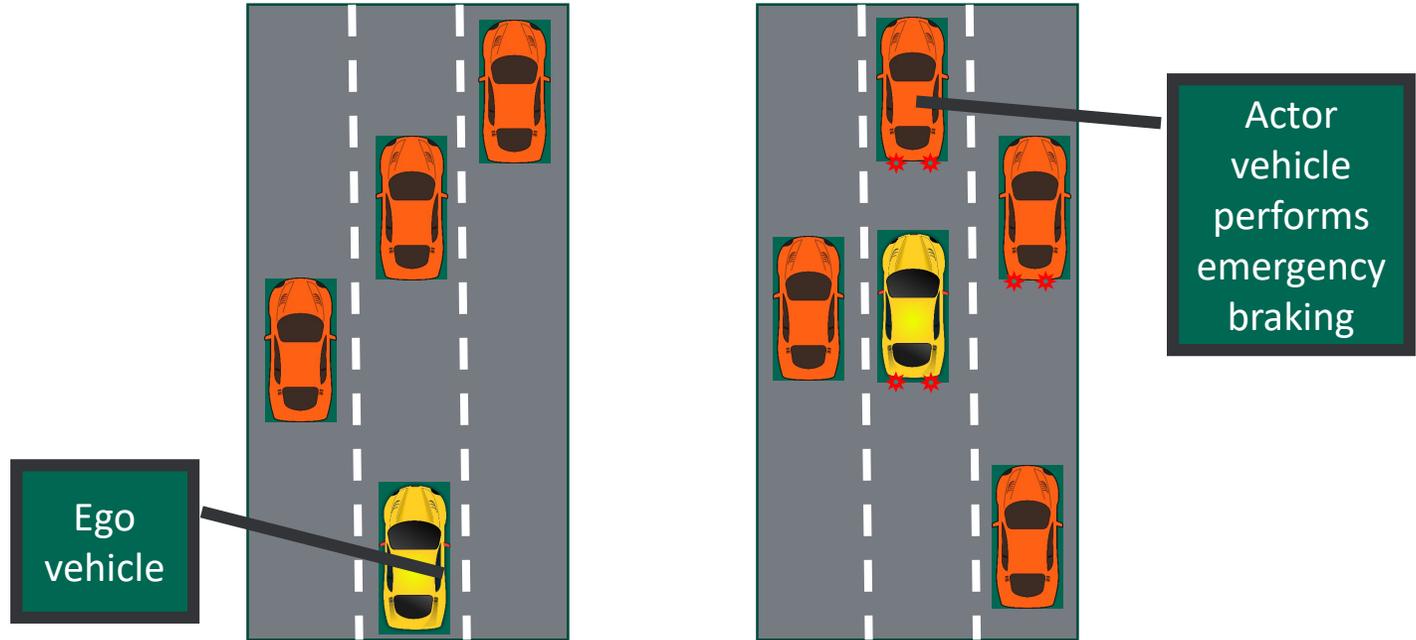

Department
for Transport

What is a Scenario?

What is a Scenario?

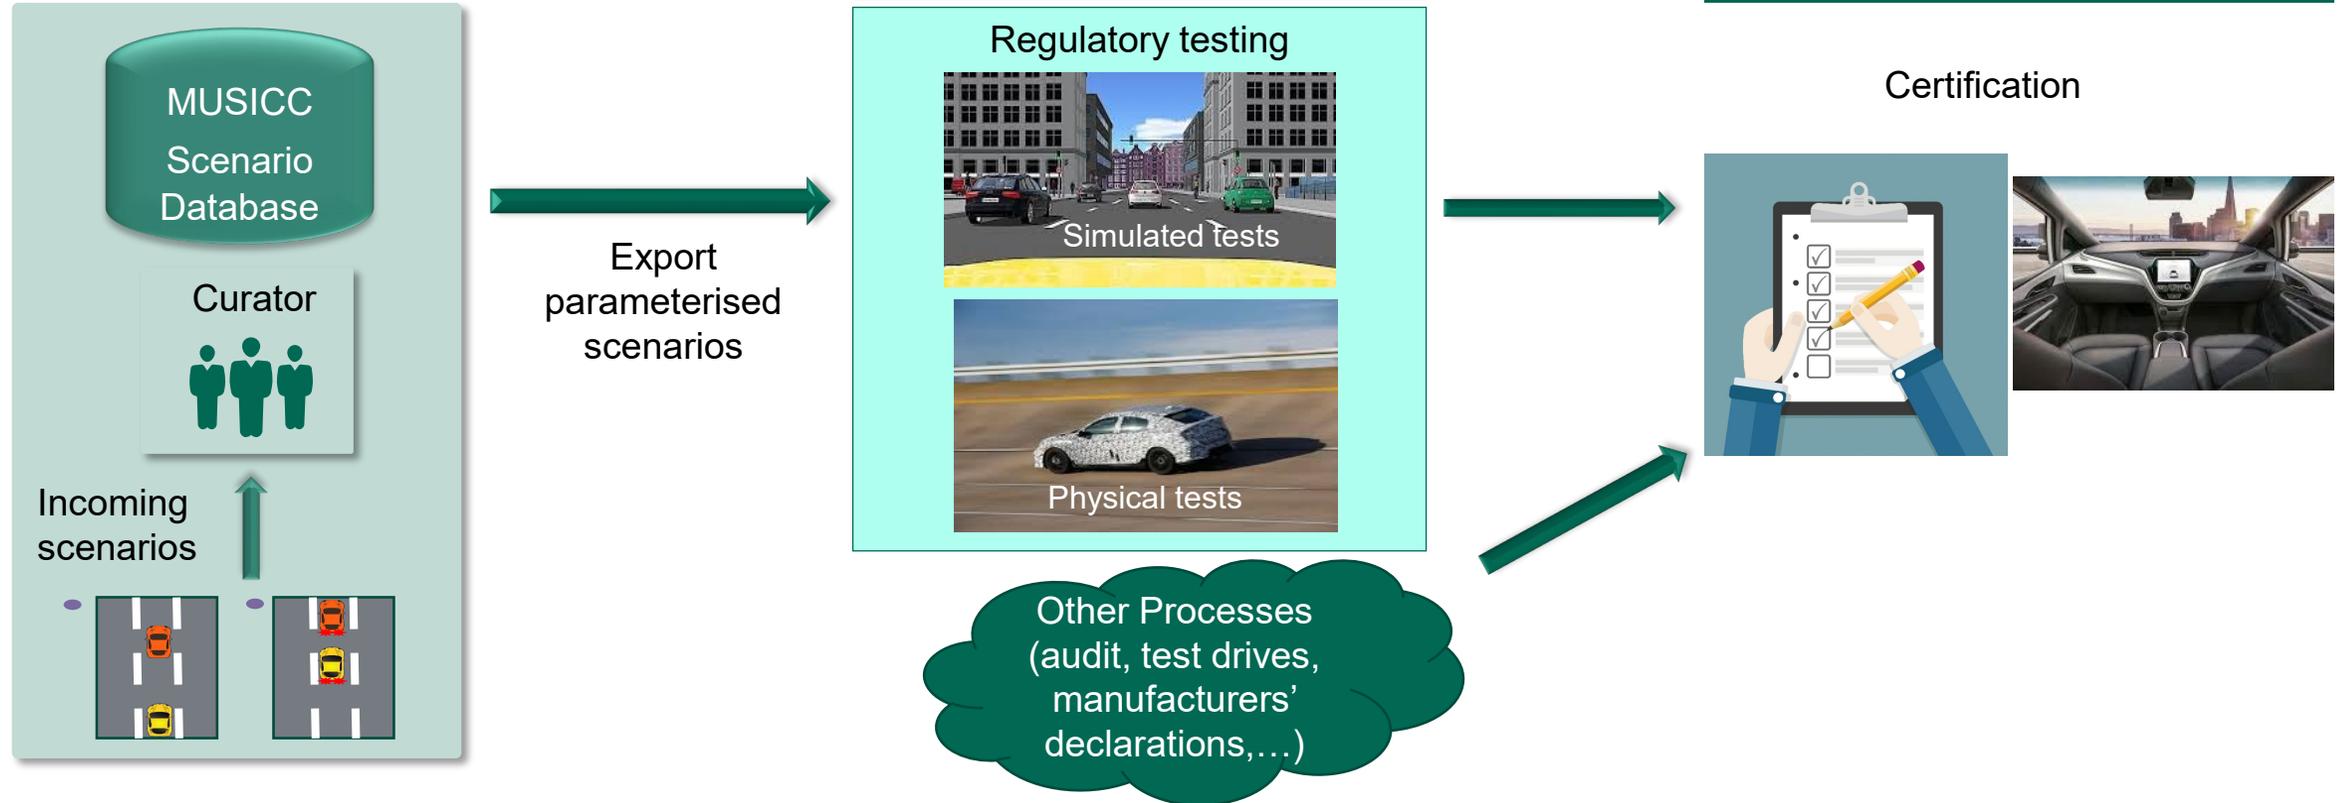

Defines:

- Initial conditions of actors
- Behaviour of actors
- Environmental and geographical factors
- Expected outcomes

Vision: The Scenario Based Certification Process

Objectives and Approach

Approach:

- Proof-of-concept project, Apr 2018 – Mar 2020
- Close collaboration with vehicle manufacturers, ADS developers, organisations with expertise in CAV validation, and regulators
- Focus on simulation testing environments

Objectives:

- Implement a language to describe scenarios, aligned with industry standards
- Build an open and expandable library for CAV certification scenarios

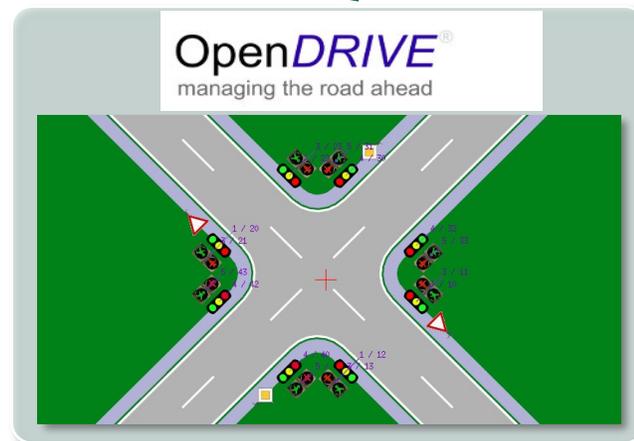

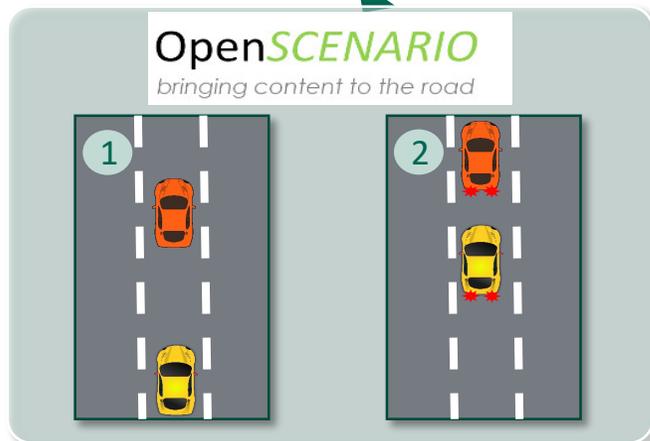

Scenario Description Language

MUSICC Scenario Record
– Metadata
– Parameterisation
– Ego goal

Association for Standardization of
Automation and Measuring Systems

- The Scenario Description Language (SDL) defines a consistent format for representing scenarios
- Stakeholders will be more likely to engage if a standardised or widely compatible format is used

The MUSICC Roadmap

Phase 1: Apr '18 – Apr '19		Phase 2								2019			2020		
Phase 1A	Phase 1B	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar			
Engage stakeholders, map existing work and gaps															
	Design SDL														
	Develop beta DB system														
		User trials													
		Software development													
		SDL enhancements and alignment with emerging standards													
		Integration with simulation tools													
		Advisory group engagement and scenario population													
										User Acceptance Tests
