

Digital mobility

A new challenge for RAIL

Jean-Pierre LOUBINOUX
CEO UIC

A shift towards rail is **crucial** and **urgent** for sustainable international transport corridors

Unparalleled safety

Vital to Eurasian industry

Much lower environment cost

Much higher utilisation of existing infrastructure is possible

Mobility as a service

- Rail part of logistics
- From rail to HyperRail: blockchain
- Transparency and traceability
- Corridors are a key tool
- Transport efficiency
- Container trains agreement, CIM/SMGS, UIC ECCO and Eurasian stakeholder group

Smart transportation

- Rapid urbanization
- Environmental factors
- Age of on-demand access
- Rise of on-demand services
- 69% of millennials use multimodal transport more than 3 times a week

Why Digital ?

- 90% of data was created in the last 2 years
- On-demand real-time information
- Customer experience upgrade
- Connectivity
