

Actions of the inland transport sector to  
join the global fight against climate change

85<sup>th</sup> Session

**INLAND TRANSPORT COMMITTEE**

**UNECE**

## **Inland shipping**

The ADN and the fight against climate  
change

# Inland shipping

## ADN and climate change

- The ADN itself will be made “SDG-proof”
- The ADN Safety Committee introduces a permanent agenda item for each meeting: “2030 Agenda for sustainable development”.
- Alternative fuels are a key factor:
  - Developments for transport of non-dangerous goods to be “implanted” in ADN regulations.
  - ADN Safety Committee recognizes need for flexible approach, to avoid uncertainty for investors, and recommendations for certifying innovative concepts.
  - Long lifetime of ships calls for easy retrofit.
- Development of a list of possible innovative propulsion systems and list of criteria.
- No transport is the best transport.

Actions of the inland transport sector to  
join the global fight against climate change

85<sup>th</sup> Session

**INLAND TRANSPORT COMMITTEE**

**UNECE**

**Thank you!**

Henk Langenberg  
Chair ADN Safety Committee
