UNECE STANDARD DDP-15

concerning the marketing and commercial quality control of

DRIED APRICOTS

2016 EDITION

UNITED NATIONSNew York and Geneva, 2016

NOTE

Working Party on Agricultural Quality Standards

The commercial quality standards developed by the United Nations Economic Commission for Europe (UNECE) Working Party on Agricultural Quality Standards help facilitate international trade, encourage high-quality production, improve profitability and protect consumer interests. UNECE standards are used by Governments, producers, traders, importers and exporters, and other international organizations. They cover a wide range of agricultural products, including fresh fruit and vegetables, dry and dried produce, seed potatoes, meat, cut flowers, eggs and egg products.

Any member of the United Nations can participate, on an equal footing, in the activities of the Working Party. For more information on agricultural standards, please visit our website http://www.unece.org/trade/agr/welcome.html.

The new Standard for Dried Apricots is based on document ECE/CTCS/WP.7/2016/7 reviewed and adopted by Working Party at its seventy-second session.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the United Nations Secretariat concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Mention of company names or commercial products does not imply endorsement by the United Nations.

All material may be freely quoted or reprinted, but acknowledgement is requested.

UNECE Standard DDP-15 concerning the marketing and commercial quality control of Dried Apricots

I. Definition of produce

This standard applies to dried apricots of varieties (cultivars) grown from *Prunus armeniaca* L., intended for direct consumption. This standard does not apply to dried apricots that are processed or for industrial processing, except when mixed with other products for direct consumption without further preparation.

Dried apricots may be presented in one of the following styles:

- · Whole, unpitted
- · Whole, pitted
- halves (cut longitudinally into two parts before drying)
- slabs: whole and half apricots of irregular shape, size and thickness, that have lost their normal contour and have become definitely flattened at the edge or rim.

II. Provisions concerning quality

The purpose of the standard is to define the quality requirements of dried apricots at the export-control stage, after preparation and packaging.

However, if applied at stages following export, the holder/seller shall be responsible for observing the requirements of the standard. The holder/seller of products not in conformity with this standard may not display such products or offer them for sale, or deliver or market them in any other manner.

A. Minimum requirements¹

In all classes, subject to the special provisions for each class and the tolerances allowed, the dried apricots must display the following characteristics:

- intact; however, slight superficial damage is not considered as a defect; the fruit may be pitted or cut into halves
- sound; produce affected by rotting or deterioration such as to make it unfit for human consumption is excluded
- · clean; practically free of any visible foreign matter
- · sufficiently developed
- free from living pests whatever their stage of development
- free from damage caused by pests, including the presence of dead insects and/or mites, their debris or excreta

Date of issue: 21 November 2016

Definitions of terms and defects are listed in Annex III of the Standard Layout – Recommended terms and definition of defects for standards of dry (Inshell Nuts and Nut Kernels) and dried produce http://www.unece.org/trade/agr/standard/dry/StandardLayout/StandardLayoutDDP_e.pdf>.

- free from blemishes, areas of discolouration or spread stains in pronounced contrast with the rest of the produce affecting in aggregate more than 5 per cent of the surface of the produce
- free from mould filaments visible to the naked eye
- free of fermentation
- · free of abnormal external moisture
- free of foreign smell and/or taste except for a slight salty taste of sodium chloride and/or calcium chloride and a slight smell of preservatives/additives, including sulphur dioxide.

The condition of the dried apricots must be such as to enable them:

- · to withstand transportation and handling
- to arrive in satisfactory condition at the place of destination.

B. Moisture content²

The dried apricots shall have a moisture content as follows:

- not exceeding 25.0 per cent for untreated dried apricots
- above 25.0 per cent and not exceeding 40.0 per cent for dried apricots treated with preservatives or preserved by other means (e.g. pasteurization) and products between 32.0 and 40.0 per cent should be labelled as high moisture or equivalent denomination.

C. Classification

In accordance with the defects allowed in section "IV. Provisions concerning tolerances", dried apricots are classified into the following classes:

"Extra" Class, Class I, Class II.

The defects allowed must not affect the general appearance of the produce as regards quality, keeping quality and presentation in the package.

III. Provisions concerning sizing

Sizing of dried apricots is mandatory for "Extra" Class and Class I.

Size is determined by:

- the number of fruit per kilogramme (1,000g) or
- diameter (diameter means the shortest measurement across the face of the apricot half when restored to its normal position).

Uniformity in size can be achieved according to one of the following options:

The moisture content is determined by one of the methods given in Annex I of the Standard Layout – Determination of the moisture content for dried producehttp://www.unece.org/trade/agr/standard/dry/StandardLayout/StandardLayoutDDP_e.pdf. The laboratory reference method shall be used in cases of dispute.

A.	By number	of fruit per	kilogramme:

Size Code	Number of whole, unpitted fruit per kilogramme	Number of whole, pitted fruit per kilogramme	Number of fruit halves per kilogramme
0	Less than 60	Less than 80	Less than 160
1	61-80	81-100	161-200
2	81 - 100	101 – 120	201 - 240
3	101 – 120	121 – 140	241 - 280
4	121 – 140	141 – 160	281 - 320
5	141 – 160	161 – 180	321 – 360
6	161 – 180	181 - 200	361 – 400
7	181 - 200	201 - 220	401 - 440
8	201 and over	221 and over	441 and over

To ensure uniformity in extra class, the weight of the heaviest 10 pieces of dried apricots of the same size code should not exceed two times the weight of the lightest 10 pieces of dried apricots of the same size code.

B. By diameter:

Range (inches)	Range (mm)
1 3/8 and larger	34 mm and larger
1 1/4-1 3/8	31-34 mm
1 1/8-1 1/4	28-31
1 - 1 1/8	25-28
13/16 - 1	20-25
Smaller than 13/16	Smaller than 20 mm

C. Size ranges other than option A. or B. and size codes other than option A. are allowed provided that the range used is labelled accordingly such as.

Grade code	Number of whole fruit wi	thout stones pe	r per kilogramme
A	140 and less	or	32 mm and bigger
В	141-180	or	29-32 mm
C	181-220	or	25-29 mm
D	221-260	or	21-25 mm
E	261 and more	or	Less than 20 mm

However, when a size code is indicated, it should not conflict with Option A.

IV. Provisions concerning tolerances

At all marketing stages, tolerances in respect of quality and size shall be allowed in each lot for produce not satisfying the minimum requirements of the class indicated.

A. Quality tolerances

	Tolerances allowed, percentage of defective produce, by number or weight ^(a)		
Defects allowed	Extra	Class I	Class II
(a) Tolerances for produce not satisfying the minimum requirements	9	15	20
of which no more than:			
Mouldy	1	1	1
Rotten	1	1	2
Damage caused by pests	1	2	4
Fermented (untreated)	2	3	5
Fermented (treated)	1	1	2
Living pests	0	0	0
Dirty	2	5	8
Substantial defects in colour or texture,			
heat injury and sunburn	5	8	10
Spotted	3	5	10
Lesion and Calluses	3	6	8
(b) Size tolerances			
Produce not conforming to the size indicated by diameter, in total (if sized by diameter)	10	10	10
(c) Tolerances for other defects			
Foreign matter and extraneous vegetable materials except pits, pit fragments in pitted fruit (by weight)	0.5	0.5	0.5
Presence of pits, pit fragments and pedicels in pitted fruit	1	1	2
Presence of pieces among whole fruit and halves	2	4	6
Dried apricots belonging to varieties other than that indicated	10	10	10

⁽a) A minimum sample unit of one kilogramme is required for the test.

V. Provisions concerning presentation

A. Uniformity

The contents of each package must be uniform and contain only dried apricots of the same origin, quality, style and size (if sized) and if indicated, variety and/or crop year.

The visible part of the contents of the package must be representative of the entire contents.

B. Packaging

Dried apricots must be packed in such a way so as to protect the produce properly.

The materials used inside the package must be clean and of a quality such as to avoid causing any external or internal damage to the produce. The use of materials, particularly of paper or stamps bearing trade specifications, is allowed, provided the printing or labelling has been done with non-toxic ink or glue.

Packages must be free of all foreign matter in accordance with the table of tolerances in section "IV. Provisions concerning tolerances".

VI. Provisions concerning marking

Each package³ must bear the following particulars in letters grouped on the same side, legibly and indelibly marked and visible from the outside:

A. Identification

Packer and/or dispatcher:

Name and physical address (e.g. street/city/region/postal code and, if different from the country of origin, the country) or a code mark officially recognized by the national authority⁴.

B. Nature of produce

- "Dried Apricots" which may be replaced, when appropriate, by high moisture dried apricots or equivalent denomination
- Style
- Name of the variety (optional)

C. Origin of produce

• Country of origin⁵ and, optionally, district where grown or the national, regional or local place name.

D. Commercial specifications

- Class
- Size (if sized) expressed as;

³ These marking provisions do not apply to sales packages presented in packages.

⁴ The national legislation of a number of countries requires the explicit declaration of the name and address. However, in cases where a code mark is used, the reference "packer and/or dispatcher" (or equivalent abbreviations) must be indicated in close connection with the code mark, and the code mark should be preceded with the ISO 3166 alpha country code of the recognizing country, if not the country of origin.

⁵ The full or commonly used name should be indicated.

- Option A by numerical code (as defined in section III), and/or range; or
- Option B by diameter (as defined in section III); or
- Option C by alphabetical code and range
- Crop year (optional)
- "Naturally" dried (optional)
- "Best before" followed by the date (optional).

E. Official control mark (optional)
