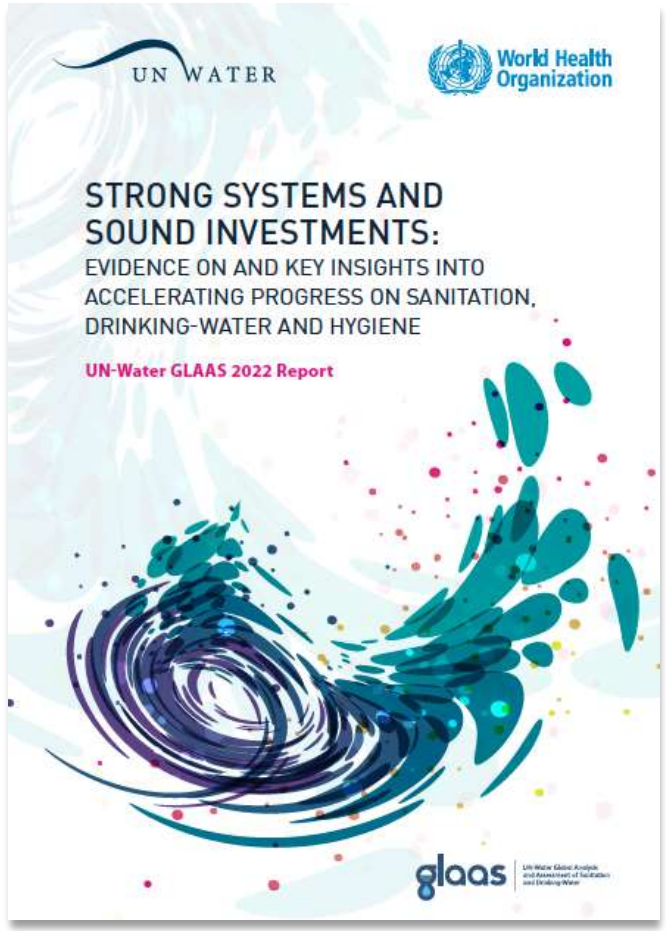
Other WASH indicators

- Handwashing
- WASH in schools, WASH in health care facilities

Update on GLAAS 2024/2025 data collection cycle

What is GLAAS?

- The UN-Water Global Analysis and Assessment of Sanitation and Drinking-Water (GLAAS) is a **global monitoring mechanism** for the WASH enabling environment:
  - A global update on **WASH systems**, including policy frameworks, institutional arrangements, monitoring systems, regulation, human resources and finance.
- Co-custodian of the Means of implementation targets **SDG 6.a and 6.b.**
- At the global level and in some regions, **WHO and UNICEF** will be collaborating closely on GLAAS: the next GLAAS report will be co-branded with WHO, UNICEF, and UN-Water.



The GLAAS 2022 Report

GLAAS 2024/2025 cycle - Updates

- Updates to the **GLAAS 2024 country survey:**
  - New questions on climate resilient WASH, human resources, national monitoring indicators and management information systems.
- **eGLAAS:** The online version of the GLAAS country survey package is available in English, French and Spanish
  - To complete the GLAAS 2024 country survey using eGLAAS, please contact the WHO regional office and glaas@who.int
- **GLAAS data portal:** All data from the GLAAS 2024 country survey will be made available on the GLAAS data portal, including country highlights for the GLAAS 2024/2025 cycle.
